**Selecting The Right Grass**
With many warm-season turfgrass options available, determining the most appropriate is a daunting task.

**Physical Soil Testing**
Testing by Accredited Laboratories can have a positive impact on the profitability, playability, and longevity of a golf course.

**Water and Turfgrass in the Arid Southwest**
Water use rates of Tifway 419 bermudagrass, Seaside1, seashore paspalum, and inland saltgrass.

**Soil Testing Methods for Sand-Based Putting Greens**
Iowa State University research explores nutrient-holding capacity of putting green rootzones.

**Converting Bermudagrass to Seashore Paspalum**
A successful case study on why and how turfgrass conversion should occur.

**So You Want to be a Golf Course Superintendent?**
A turf student's perspective on the golf course manager career path.

**Physical and Chemical Soil Characteristics of Aging Golf Greens**
A novel approach from University of Nebraska researchers yields information regarding how putting green rootzones change.

**Improving Environmental Performance**
It improves more than just the environment.

**Look Before You Leap**
Other insects besides the turfgrass ant can cause temporary disruption to a putting surface.

**Physical Soil Testing**
Testing by Accredited Laboratories can have a positive impact on the profitability, playability, and longevity of a golf course.
