USGA congratulates the GCBAA and its membership for their support of the game. The Golf Course Builder's Association® provides each Sticks for Kids location with clubs, bags, teaching and marketing materials, and instructors for participating courses. To learn more about this program and the GCBAA, visit sticksforkids.org.

### GCBAA RAISES OVER $50,000 FOR STICKS FOR KIDS

Like many other programs in the past, the GCBAA is interested in an easy way to save money. However, it is important to ask, “Can the ideas be implemented?”

Interested in an easy way to save money? Eliminate the intermediate rough and maintain the primary rough at a height of 2.0 to 2.25 inches and definition between fairways and roughs. Sounds like an easy decision, doesn’t it? Not so fast. Golfers may be saved.

The intermediate rough increases cost, but not necessarily a reduction in turfgrass survival. Golfers should be interested to know that less water will result in less turf color persist. Golfers should be interested to know that less water will result in less turf color persist. Golfers should be interested to know that less water will result in less turf color persist. Golfers should be interested to know that less water will result in less turf color persist.
