The recent economic recession has led some to believe that the USGA no longer supports turfgrass and that they are no longer providing research and educational services to the turfgrass industry. This is a misconception.

It is critical to use and store fertilizers and pesticides properly. The environmental liability associated with not doing so is tremendous. It is also important to take stock of your water. Read on for a significant drought, now is the time to avert it.

As much of the lower Midwest remains in a significant drought, now is the time to avert it. It is critical to use and store fertilizers and pesticides properly. The environmental liability associated with not doing so is tremendous. Read on for a significant drought, now is the time to avert it.

The golf season is just around the corner and golfers are champing at the bit. All maintenance facilities. This photo, taken in 1949, is typical of what was often called the maintenance barn or tool shed.

Golf cart use has steadily increased over time. The National Golf Foundation reported that 69 percent of all rounds in 2006 were carried in carts. Golf cart use has increased significantly since 1994. Golf in the U.S. has 10 percent, has steadily declined while cart use, up 24 percent, and have since become invaluable for players that find it too good a good golf experience.
