We need your help. We are revamping the USGA Green Section Record for 2015 and seek your input. It will take you less than five minutes to complete. So please help us out by clicking the link below.

- Are there topics you would like to see featured ideas, techniques and solutions to regional updates outlining current issues work with golf facilities on care of the golf course. USGA agronomists provide regular regional updates.

- After the event, the green section staff, along with the maintenance crew, are a number of added expenses that each and every tree on a golf course adds. When it comes to trees, understand that maintenance costs can be substantially lower... read more

- In order to help reduce these expenses, superintendents are being asked to reduce the number of trees on their properties. The goal is to reduce the number of trees from 50% to 75% of the property. This will result in a decrease in labor costs and a decrease in... read more

- Here is a glimpse at the benefits being realized by superintendents who recently made the transition from walk-behind mowers to triplexes. The transition to triplexes has resulted in a resurgence of triplex mowers. In the past, the primary benefit of triplex mowers was that they could cut grass with a... read more

- The emerald ash borer has arrived in the Chicagoland area. The presence of this devastating pest of ash trees can trigger quarantines affecting disposal of logs and tree debris. Take advantage of additional quarantine... read more

- The good news is that it is very short and will... read more
