The April 3, 2015 issue of the USGA Green Section Record is available online. The Green Section Record is a biweekly publication by the United States Golf Association (USGA) and the Golf Course Superintendents Association of America (GCSAA).

### What's New From The USGA Green Section

- **Browse All Past Issues**

### In Case You Missed It

- **May 8, 2015**
  - Learn ten techniques to enhance the success of birdhouses at your course.

### Residential Rainwater Reuse

- **CENTRAL REGION**
  - Spring is a great time to develop and fine tune soil moisture monitoring programs that can help manage water use and identify potential issues with automatic irrigation systems throughout the year.

### Turfgrass Diseases

- **SOUTHEAST Region**
  - Warm-season grasses are emerging from dormancy in much of the Southeast Region. However, winter annual weeds also are flourishing. Developing a well-planned weed management program that includes a diligent cultural management approach can provide a competitive advantage.

### Soil Moisture Management

- **NORTHEAST REGION**
  - Soil moisture management stress.

### Course Consulting Service Information

- **GCSAA Course Consulting Service**
  - USGA staff members can provide you with guidance in various areas of your course's operations. There is no charge for a consultation.

### Policies for the Reuse of USGA Green Section Publications

1. Notification of your Intent To Reprint Content.
2. Inclusion of the appropriate Reprint Permission Language.
3. Mention of the publication's ISSN: 2156-5813.
