

Managing New Putting Greens

By [Zach Nicoludis](#) and [Adam Moeller](#)

Putting green conditions have a tremendous influence on a golfer's perception of a course. Many maintenance practices can be implemented to improve smoothness and consistency, but sometimes the turf species, poor drainage, or the growing environment are limiting factors in meeting golfer expectations. To address these issues and deliver high-quality putting conditions more consistently, golf facilities often invest in renovating their putting greens.

This article will guide you through the critical factors that impact the health and performance of newly seeded or sprigged putting greens.

Fore The Golfer: Maintaining Smooth Greens Is A Team Effort

To provide smooth conditions on putting greens, golf course superintendents rely on a variety of tools and techniques. One tool - the roller - has been relied on since some of golf's earliest days, and it's used for a lot more than just managing putting green speed. Learn more about this important tool and discover the challenges surrounding its use.

Fore The Golfer: Helpful Putting Green Etiquette Tips

Golf courses in the north have been emerging from under blankets of snow while those farther south are preparing to condition bermudagrass as it breaks dormancy. As we all gear up for another fun-filled golf season, here are a few things to keep in mind. If we all do our part, we can help provide the best playing conditions for each other to enjoy.

Research You Should Know

Benefit Of Light And Frequent Topdressing

Topdressing helps produce smooth conditions, but ultra-dense turfgrasses can complicate the incorporation of topdressing sands applied to putting greens. So, researchers at Rutgers University have been exploring the effects of using fine topdressing sands on putting green performance. The results of their research look promising.

Fore The Golfer

Putting Green Edge And Collar Woes

Have you noticed that sometimes new putting greens look a little rough around the edges? Even if correctly built, the edges of new putting greens – especially the collars – can quickly show signs of wear. It may seem counterintuitive, but these areas are some of the most challenging areas of a new green to manage—here's why.
