

# The Honor Roll

**“FROM RESEARCH, knowledge flows unendingly.”** Thus began a USGA Green Section brochure in 1951. The same truth remains 35 years later. The USGA/Golf Course Superintendents Association of America Turfgrass Research Program for Development of Minimal Maintenance Turfgrasses for Golf had a significant year of progress in 1986. The ultimate goal, of course, is a 50 percent reduction in water use and 50 percent lower maintenance costs for golf courses nationwide — based on 1982 figures. New knowledge does flow unendingly from research, and this has been a banner year for our 10-year major effort to help *Golf Keep America Beautiful*.

Only the contributors — individuals, golf clubs, corporations, foundations shown on the Honor Roll that follows — make it possible. They have invested in the future of golf. The clubs shown with an asterisk (\*) followed by their golf course superintendents' names have specifically requested their gift, or a portion thereof, be restricted to turfgrass research. These clubs are contributing directly to the quest for better, more economically and environmentally superior turfgrasses for golf and for all who enjoy the beauty and recreation of the outdoors.

We are now in the fifth year of the 10-year research program. Investment in the project has reached \$1.25 million. The 1986 Annual Turfgrass Research Report detailing the expenditures and progress is available from the USGA.

If your name or club is on the following list, we sincerely thank you.

If your name or club is not on the list, we surely hope you will put it there next year. We need you. Research efforts of this magnitude are expensive, and they must continue. It usually takes from eight to 20 years to develop a new turfgrass variety. We need continuing annual support. The USGA and GCSAA can not possibly do it alone.

What we need is for you to urge your club to support and send the USGA Capital Fund Campaign (USGA Golf House, Far Hills, N.J. 07931) a check for the amount of \$2 per golf member at your club. Request that it be designated for Turfgrass Research. It will not then be spent for any other purpose. The funding should be generated on a continuing basis, so that the GCSAA and USGA, working together, can finance the basic, essential, coordinated, longer term research projects so desperately needed and so important to golf's future.

Won't you join with those already on the Honor Roll.
