

Talking Winter Injury Prevention on Putting Greens

In our new podcast episode, we talk about the latest research and techniques for reducing the risk of winter injury on putting greens. Dr. Mike Richardson from the University of Arkansas covers warm-season grasses and Dr. Kevin Frank from Michigan State talks about cool-season turf. Covering thresholds, fertility management and heights of cut are some key topics discussed. With cold weather arriving across the country, this is great information to help you protect the most important playing surfaces at your course.

In Case You Missed It

The shortage of assistant superintendents and potential candidates for those positions represents a huge challenge for the golf course maintenance industry today and into the future. In the December 3, 2021, issue of the USGA *Green Section Record*, we looked at the reasons behind this shortfall and different ways that superintendents around the country are trying to recruit these key members of the course maintenance team.

Coming Up Next Year

We've got a lot of great educational content planned for 2022! Next year, the *Green Section Record* will have information about managing putting green collars, fairway turf conversions, selecting grasses and more. We'll also have a wide variety of multimedia and Fore the Golfer content. Thanks for subscribing and don't hesitate to let us know if there are topics you want to see covered in the USGA *Green Section Record*.
