Winter Play on Golf Courses

Short stretches of warm winter weather can bring golfers out in force. However, golf courses have to balance the benefits of winter play with the potential issues it might cause.

Regional Updates

Keeping the Lights On

A golf course in British Columbia is experimenting with grow lights to overcome extreme shade challenges – the results have been very encouraging.

Painting Hole Locations - By The Numbers

Painting hole locations can be a nice touch for course presentation, but spending a minute or two painting edges on every hole, multiple times each week, adds up. Is it worth it?

More From The Green Section Record

In Case You Missed It

Green surrounds are one of the most heavily used parts of a golf course and they face unique maintenance challenges that often lead to disappointing conditions, even with significant maintenance efforts. In the February 4 issue of the USGA *Green Section Record*, we explored the key considerations in creating a management plan tailored to the specific needs of rough in the green surrounds.

Coming Up Next Issue

Interest in autonomous mowing on golf courses continues to grow as technology advances and labor issues remain a serious challenge for many superintendents. In the March 4 issue of the USGA *Green Section Record*, we'll provide an update on the current state of autonomous mowing in golf and look at some of the success stories and some challenges that face this exciting new technology.
