The Ins and Outs of Managing Ultradwarf Putting Greens

While there is no one-size-fits-all program for managing ultradwarf bermudagrass, many lessons have been learned since these grasses first found their way onto golf course putting greens. Management programs have evolved considerably since the ultradwarfs were originally adopted, so this article provides an up-to-date overview of the key practices required for success. Whether you're considering converting to an ultradwarf or trying to stay up to date on the latest trends in ultradwarf management, this article is for you.

Latest from Course Care

RESEARCH

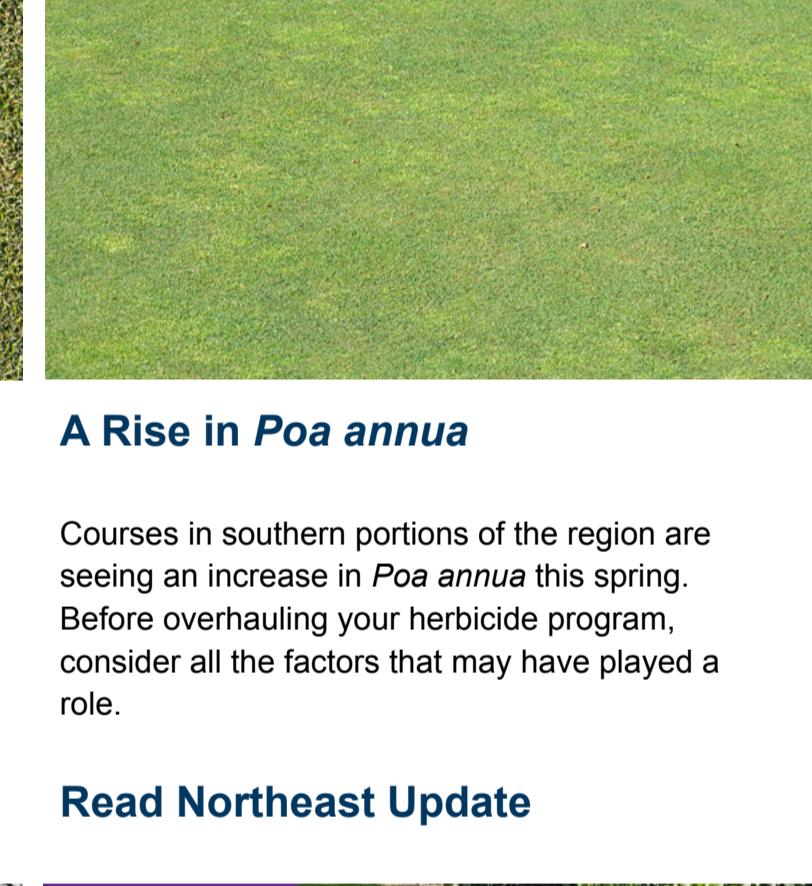

New Soil Tests to Guide Nitrogen Fertilization

Researchers investigated how novel soil tests can guide nitrogen fertilization of creeping bentgrass fairways. The test results can be good predictors of growth response and turf quality.

[Read Research You Should Know](#)

FORE THE GOLFER

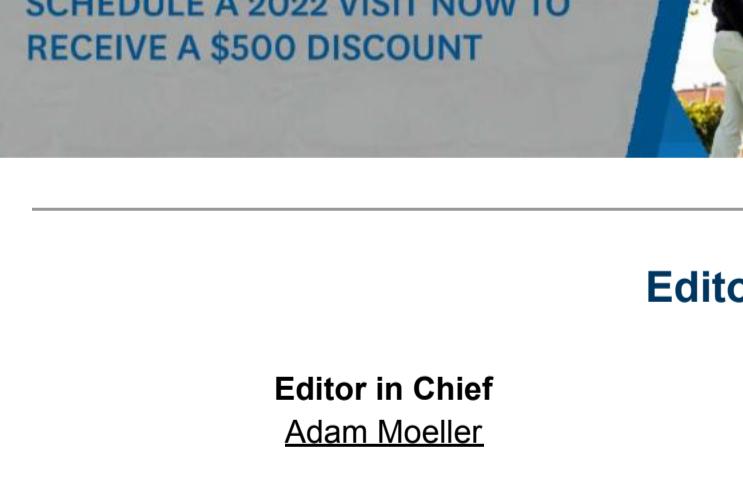

Why is it Cart Path Only?

Golf carts can cause serious damage if they're driven on a course at the wrong time. While path restrictions might be a source of frustration for golfers, they are used for good reasons.

FORE THE GOLFER

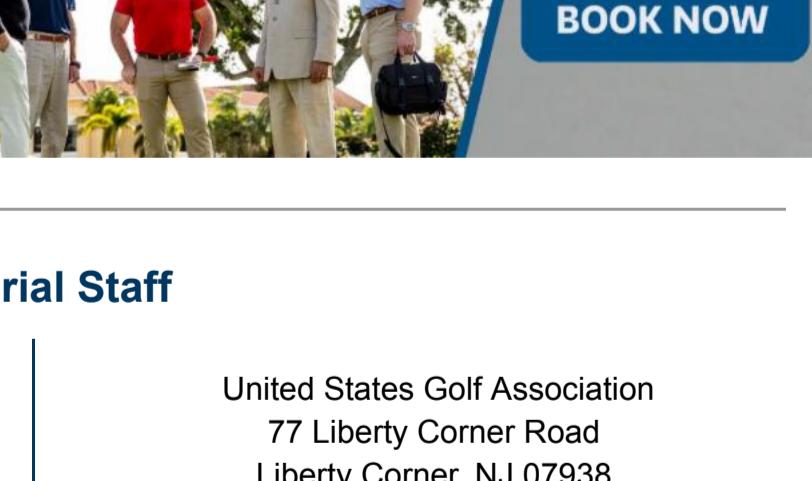

How Staffing Challenges are Changing Golf Course Maintenance

Course maintenance departments are struggling to hire and retain staff. Superintendents are adjusting by streamlining maintenance, investing in equipment and prioritizing what matters most.

FORE THE GOLFER

Why Golf Courses Topdress Greens

Regular topdressing is a key part of maintaining high-quality putting greens. While the sand may temporarily impact playability, the benefits are well worth some short-term disruption.

[Watch Video](#)

Regional Updates

WEST

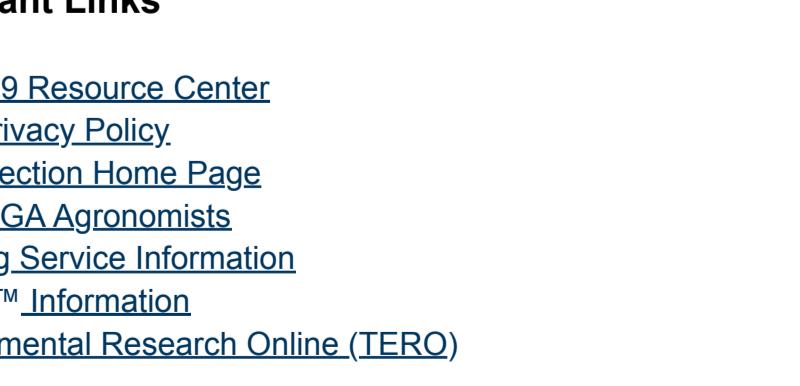

Lose the Layers

Roots generally grow deeper in rootzones with more consistent moisture and nutrient-holding capacity, so make sure that topdressing and aeration keep up with organic matter accumulation.

NORTHEAST

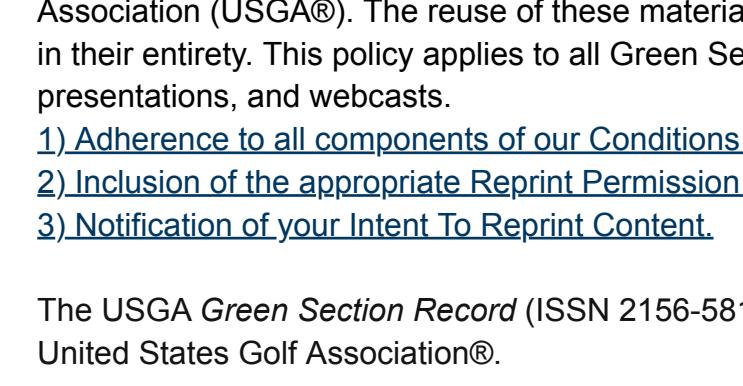

A Rise in Poa annua

Courses in southern portions of the region are seeing an increase in *Poa annua* this spring. Before overhauling your herbicide program, consider all the factors that may have played a role.

[Read Northeast Update](#)

CENTRAL

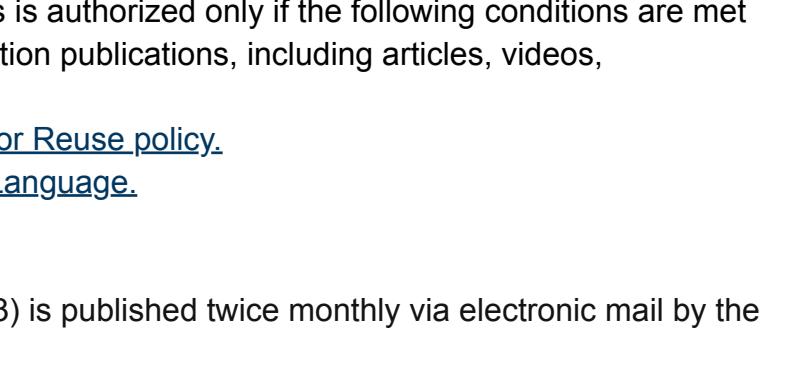

Cold Weather Hindering Aeration Recovery

Below-average temperatures have been frustrating this season, especially because of the prolonged recovery from spring aeration.

[Read Central Update](#)

SOUTHEAST

Golf and Nature Coexist

Golf courses benefit golfers and nature alike by providing a protected environment that is removed from the hustle and bustle of everyday life.
