

Cover Photo: This 70-foot tulip poplar was ignored and eventually fell — on the green. Fortunately, no one was injured.

The love of trees is painfully evident with some specimens that people have a hard time giving up.

Wildflowers provide a landscape alternative in many low-maintenance areas, both on and off the golf course.

USGA® GREEN SECTION Record

1

Developing a Tree Care Program

Trees play an important role on golf courses, and their care and management should be planned carefully.

By James Skorulski

8

Wildflowers on Your Course?

They may provide a welcome new dimension to your course.

By John M. Krouse

12

Control Those Shrinking Greens

Pay close attention to avoid those slow, incremental changes.

By Keith Happ

14

A Practical Approach to Putting Green Fertilization

Have you ever felt a little confused about how to fertilize putting greens?

By R. A. (Bob) Brame

17

Managing Wildlife and Habitat

Consider the ways your course can fit into the environmental "big picture."
