Irrigation Design, Rocket Science, and the SPACE Program
Selecting sprinklers and determining the spacing is not rocket science. Not when using the SPACE program to model coverage and distribution.
By Mike Huck

Checking Your Sand — Quality Control Begins at Home
A quick check of sand with your own testing equipment can help avoid problems later.
By James E. Moore

KTURF: A Pesticide and Nitrogen Leaching Model
A computer model available on the Internet and World Wide Web helps turfgrass managers predict pesticide and nitrogen leaching.
By Dr. Steve Starrett, Dr. Shelli Starrett, Judy Hill, and Greg Adams

Battling the Bermudagrass Blitz
Several key practices can help you win the war against bermudagrass encroachment.
By Chris Hartwiger

The Living Dead
Dead trees offer habitat and sustenance to all living things.
By Ron Dodson

Buyer . . . Beware
Products without active ingredients may not be active!
