Does Your Irrigation System Make The Grade?
A guide to help evaluate factors influencing irrigation system performance.
By Mike Huck

Aquifer Golf
Imagine a world where a golf course can coexist with a municipal water supply and not be the center of constant protest.
By Frank A. Rendulic, CGCS

And The Survey Says . . .
Converting to creeping bentgrass fairways should be based on sound economics and environmental consciousness.
By Paul Vermeulen

Winter Protection of Annual Bluegrass Golf Greens
How protective covers can reduce winter damage to putting greens.
By Julie Dionne

Understanding Water Quality and Guidelines to Management
An overview of challenges for water usage on golf courses for the 21st century.
By R. R. Duncan, R. N. Carrow, and M. Huck

Back to Basics: Restoring Playability and Native Wildlife Habitats
Is your golf course planning to undertake a renovation or restoration project? Now is the time to plan for environmental and wildlife enhancements.
By Fred Yarrington

Perfection Is Not Attainable!
However, setting reasonable goals can allow for an objective evaluation of course conditions.
By Keith Happ

Turf Twisters
