## Contents

January-February 2006 Volume 44, Number 1

1 **Rebuild or Resurface**  
Greens must be rebuilt every 15 to 20 years, even those of USGA method construction — or do they?  
BY BUD WHITE

7 **Resistant Turfgrasses for Improved Chinch Bug Management**  
University of Nebraska researchers document multiple chinch bug resistance in cool- and warm-season turfgrasses.  
BY TIFFANY M. HENG-MOSS, F. P. BAXENDALE, R. C. SHEARMAN, AND T. E. EICKHOFF

12 **Roughing It With Bermudagrass**  
A review of basic management practices for the dominant warm-season turfgrass used in roughs.  
BY JOHN FOY

16 **The Annual Bluegrass Weevil Rears Its Ugly Head**  
New control options worth considering in the fight against the annual bluegrass weevil.  
BY PAT VITTUM

18 **Bonne Etiquette!**  
Golf course superintendents and the Green Committee can lead the way.  
BY MATT NELSON

21 **Mowing Roughs to Minimize Runoff**  
Scientists at Oklahoma State University demonstrate the environmental protection value of multiple-height roughs.  
BY GREG BELL AND JUSTIN MOSS

26 **Paying the Price for Success**  
An open letter to aspiring turfgrass professionals.  
BY JIM SIMMONS

30 **GeoCamp Is Here Again!**  
Golf courses participate in a program to help young students become “Habitat Heroes.”  
BY JENNIFER HILL

32 **A Blueprint for Management**  
Shaping the Audubon program to address golf's environmental concerns.  
BY JEAN MACKAY AND JOELLEN ZEH

34 **USGA Publications**

35 **2006 USGA Green Section Education Conference Golf Industry Show and 2006 USGA National & Regional Conferences**

36 **Speed Demons**  
Who's to blame in the need for speed?  
BY MATT NELSON

38 **Turf Twisters**

---

**Cover Photo**  
Golf courses facing the decision to renovate their greens should also consider the option of resurfacing versus rebuilding.
