May-June 2009 Volume 47, Number 3

14

**2 Terry Bonar —**  
Green Section Award  
Recipient

**4 Water, Water  
Everywhere!**

Overwatering of fine turf areas has concrete costs. Intangible impacts of overwatering may be more difficult to quantify, but ultimately they impact the bottom line.

BY DARIN S. BEVARD

**7 The Costs of  
Blowing Wind**

A guide to the selection, installation, and operation of fans for better summer performance of bentgrass putting greens.

BY PATRICK M. O'BRIEN

**10 Overcome Your  
Infatuation with Base  
Saturation**

Does it make sense to apply all that calcium?

BY BRIAN WHITLARK

**14 With a Good Mechanic,  
It Will Run Forever**

A great mechanic is not a substitute for regular replacement of equipment.

BY CHRIS HARTWIGER

**16 Bunkers: Can Your  
Golf Course Afford Them?**

Due to the high cost of maintaining them, bunkers are an obvious place to look for ways to save money.

BY JIM MOORE

**18 What Inorganic  
Soil Amendments  
Really Have to Offer**

When it comes to inorganic vs. organic amendments, consider carefully.

BY BUD WHITE

28

**20 Pipe Dreams**

Do water conditioners and in-line pipe devices really work?

BY PATRICK J. GROSS

**25 Form vs. Function**

The "WOW" factor can be costly.

BY KEITH HAPP

**28 Naturalized Areas:  
Beauty and the Beast**

Developing naturalized areas brings many benefits to the golf course, but beware, maintenance-free they are not!

BY JIM SKORULSKI

AND JOHN FOY

**31 Dollars and Sense:  
Making It in a  
Tough Economy**

In these hard times, sometimes superintendents have to be extra creative.

BY THE USGA  
GREEN SECTION STAFF

**35 News Notes**

**38 Turf Twisters**
