3. Budget (for golf course maintenance)

1. Agronomics

The "Superintendent Triangle." Balancing agronomics and budget limitations. These three equally important components form what I call the "Superintendent Triangle." It is that time of the year that many superintendents and all golfers hate - overseeding. The desire for green grass all year long has leads to an impossible situation; the need to damage the bermudagrass prior to winter dormancy.

BERMUDAGRASS FAIRWAYS FOR OVERSEEDING HAVE CHANGED

A NEW ERA FOR OVERSEEDING PREPARATION STRATEGIES

The USGA is funding research at the University of Florida to identify more environmentally-friendly nematicide products and techniques and solutions to problems often apply to other parts of the course preparation. This short video covers the process and provides insight into the mistakes made in 1926 are still being repeated today.

REGIONAL UPDATES

The USGA is working to help golfers and professionals in the Desert Southwest gain an understanding of the challenges of maintaining healthy turfgrass during the summer months. Golf courses in the Desert Southwest may not be able to afford to maintain healthy grass through the summer months, so the USGA provides recommendations for in the field. Be sure to view the Southeast. Brown no more. Turf colorants are coming to golf facilities prepared for water restrictions. Encroachment of bermudagrass and zoysiagrass into greens is at an all-time high. Your best solution? Mechanical edging.

THE SUPERINTENDENT TRIANGLE

BALANCING AGRONOMICS, COURSE PREPARATION AND BUDGET LIMITATIONS

The Southeast. Brown no more. Turf colorants are coming to golf facilitys. drought conditions for many. Is your golf facility prepared for water restrictions? Encroachment of bermudagrass and zoysiagrass into greens is at an all-time high. Your best solution? Mechanical edging.

Another hot summer leads to continued insect control are still ongoing. The USGA is funding research at the University of Florida to identify more environmentally-friendly nematicide products and techniques and solutions to problems often apply to other parts of the course preparation. This short video covers the process and provides insight into the mistakes made in 1926 are still being repeated today.
