- The April 3, 2015 issue of the USGA Green Section Record.
- The April 8, 2015 issue of the USGA Green Section Record.

**What's New From The USGA Green Section**

- **Browse All Past Issues**
- **View Now**

**In Case You Missed It**

- **Learn ten techniques to enhance the success of birdhouses at your course.**
- **Read more about controlling turfgrass diseases in the May 8, 2015 issue of the USGA Green Section Record.**
- **Read more about developing and fine-tuning soil moisture monitoring programs that can help manage water use and identify potential issues with automatic irrigation systems throughout the year.**
- **Spending time now will pay dividends during periods of summer stress.**
- **Flourishing. Developing a well-planned weed management program will improve weed control and minimize the risk of developing herbicide-resistant weed populations.**
- **Southeast Region.** However, winter annual weeds also are flourishing. Developing a well-planned weed management program will improve weed control and minimize the risk of developing herbicide-resistant weed populations.

**Important Update**

- The second phase of the Golf Course Environmental Profile (GCEP), which began March 17, will demonstrate environmental stewardship and ensure the future of the game. This survey is the second phase of the Golf Course Environmental Profile (GCEP), which began March 17. The first phase of the Golf Course Environmental Profile (GCEP), which began March 17, established baseline information, but updated information is needed. The USGA is collecting important data from superintendents nationwide regarding nutrient use and management. Everyone's participation is needed to help measure industry efforts to better demonstrate environmental stewardship and ensure the future of the game. This survey is the next phase of the Golf Course Environmental Profile (GCEP), which began March 17. The first phase of the Golf Course Environmental Profile (GCEP), which began March 17, established baseline information, but updated information is needed.
