Is It Time To Rebuild Your Greens?  

DIGITAL COLLECTION:

View The “Is It Time To Rebuild Your Greens?” Collection Now

Resource.

The collections can be viewed online in a user-friendly digital magazine format, as disease pressure from large patch and take-all patch may arise.

NORTHEAST REGION

Learn how best to prevent these potentially harmful pests in this week's Regional Update.

CENTRAL REGION

While preparations for winter are in full force in the Southeast, USGA agronomists offer tips for a successful fall and winter.

SOUTHEAST REGION

Position Now Open: Regional Director, Southeast Region

The USGA seeks a Regional Director for Southeast with extensive experience in agronomy supporting the golf industry. The director is responsible for overseeing activities within the Southeast Region. A primary focus is to develop and disseminate sustainable management practices, based on science and practical solutions, to help golf facilities maintain better playing conditions. Interested candidates should visit this page for more information.

Position Now Open: Manager, Green Section Education

Applications are now being accepted for an agronomist position based in its Columbus, Ohio, office. Candidates must possess excellent written and oral communication skills and the desire to provide high-quality progressive products and services. Interested candidates with a minimum of five years of relevant golf course industry work experience should visit this page for more information.

Position Now Open: Agronomist, Central Region

The USGA Green Section is divided into four regions staffed by agronomists who work with golf facilities on care of the golf course. USGA agronomists provide regular regional updates outlining current issues and observations from the field. Be sure to view updates from multiple regions as featured ideas, techniques and solutions to problems often apply to other parts of the course. USGA agronomists offer tips for a successful fall and winter.

The prospect of having to rebuild one, a few or all of the putting greens is a reality that many golf course superintendents could face. The decision to rebuild or to maintain is typically based on a number of factors affecting turf growth, putting green performance and the type of conditioning course operations, not to mention the cost. There are multiple factors that affect turf growth, putting green performance and the type of conditioning course operations, not to mention the cost. There are multiple factors that affect turf growth, putting green performance and the type of conditioning course operations, not to mention the cost.
