

The Economics Of Golf Course Maintenance

By [David Oatis](#) and [Robert Vavrek](#)

When it comes to cutting costs, there is a big difference between eliminating needless amenities and compromising essential agronomic programs. The good news is that the recession caused golf facilities to re-evaluate maintenance practices, presentation options and course amenities. Many golf courses were forced to differentiate between essential and nonessential maintenance programs so they could focus on what matters most. Surprisingly, some cost-saving changes had positive effects on playability and aesthetics.

Numerous strategies have recently been utilized to reduce golf course maintenance costs; read more for a brief review of the more common strategies and their overall impacts.

Regional Updates

West Region

The recent heat wave across much of the West Region is taking its toll on *Poa annua* putting greens. Here are five strategies that can help cool-season putting greens survive hot summer temperatures.

[Read More](#)

Northeast Region

Budget submissions are right around the corner for many golf facilities. As superintendents and decision-makers work through this process, reflecting on these three considerations may benefit next season.

[Read More](#)

Central Region

Early morning tee times and later sunrises means many maintenance practices have to be completed in the dark. Adjusting the first tee time can help alleviate visibility issues and improve daily playing conditions.
