

Regional Updates

West Region

When scheduling irrigation based on evapotranspiration (ET), most use data from the previous 24 hours. What if there was a way to forecast ET rates a week into the future?

[Read More](#)

Northeast Region

Warmer temperatures in the southern portion of the region have warm-season grasses looking great. Farther north, a change in grasses to match the heat could be an option.

[Read More](#)

Central Region

Rolling putting greens in the same direction throughout the season can have a negative impact on turf health, but a few adjustments can help you manage roller traffic more effectively.

[Read More](#)

Southeast Region

Increased golf rounds and single-rider cart policies have led to additional traffic stress on turf. Using a simple chart or graph to explain the issue can help lead to a resolution.

In Case You Missed It

Selecting a bunker sand that is well-suited to the specific conditions on a golf course is critical to delivering good playability and maximizing bunker longevity. The June 5, 2020, issue of the *USGA Green Section Record* describes the key characteristics of bunker sand and provides sand selection recommendations to help you get the most from your bunker sand.

Coming Up Next Issue

While superintendents have a good understanding of the reasoning behind maintenance practices, many golfers do not. This makes communication a key component in the skill set of a successful superintendent. The July 3, 2020, issue of the *USGA Green Section Record* looks at communication strategies that can help you educate golfers and build good relationships.

From The Vault: The Good and Not-So-Good of Triplex Mowers

While triplexes are a common part of golf course maintenance today, they were once considered revolutionary. This vault article looks at some of the hopes and concerns that came with their arrival.

Golfers and Maintenance: Strategies For Sharing The Course

Encountering maintenance personnel during your round is very common. Make sure they see you and be patient while they move out of the way so they can safely prepare the course.

Course Consulting Service

"Our commitment to the golf industry has never been greater."

Now that states are reopening their economies, we want to remind you that our commitment to the golf industry has never been greater, and that the USGA Green Section is here to support your return to "the new normal" in any way we can.

- **Targeted Course Consulting:** Depending on your needs, [Course Consulting Service](#) visits can focus on specific areas of concern, or they can take a broader view—assessing multiple factors influencing playability plus economic and environmental sustainability.
- **Extended Discount:** In light of current circumstances, the \$500 early payment discount for onsite consulting visits, which typically ends May 15, has been extended for the entirety of 2020.

To take advantage of the extended discount, please reach out to an [anagronomist](#) assigned to your region, or download and submit the CCS [Registration Application](#).
