## In Case You Missed It

Managing *Poa annua* greens successfully requires a thorough understanding of the strengths and weaknesses of this turfgrass so that sound agronomic practices can be applied to optimize turf health and playing conditions. The June 4, 2021, issue of the *USGA Green Section Record* detailed key strategies that can help you get the best performance from *Poa annua* greens while minimizing the risks that come with this grass.

## Coming Up Next Issue

Distribution uniformity is the standard measure for irrigation system efficiency, but focusing on soil moisture uniformity is much more impactful for superintendents that want firm playing conditions, healthy turf and efficient water use. The July 2, 2021, issue of the *USGA Green Section Record* provides irrigation management strategies that deliver improved moisture uniformity and will almost certainly benefit your course.
