### **Developing a Tree Management Plan**

By Cory Isom

Trees are an emotional subject at golf courses and the strong feelings people have can sometimes prevent necessary management. Developing an effective tree management plan with the help of various experts will help your facility make good decisions about trees with less conflict. Understanding your tree population, documenting current issues, and outlining goals for the future will help you develop a plan that can guide your course successfully through tricky issues of tree management for decades to come.

### Strategies to Give Tees a Helping Hand

If the tees at your course are struggling to handle all the play lately, a combination of maintenance adjustments, improvement projects and golfer etiquette can give them a helping hand.

# **Sunlight Exposure**

Removing trees within about 80 feet of putting

greens may help to mitigate root intrusion, but it doesn't guarantee improved sunlight exposure. Focus more on "windows" of sunlight.
